Experience

Club Comic Studio, Brooklyn, NY – *Software & Design Consultant* | March 2022 – Present
- Consulted and developed websites, brand identities and promotional materials.
- Integrated functionality including ecommerce, CSV, and PDF capabilities into client's existing code projects.
- Designed custom websites, logos, illustrations, print materials, and audio to meet dozens of client's needs.
- Assisted clients with Wix, Squarespace, and Shopify websites.

EverQuote, Cambridge, MA – *Software Engineer* | March 2018 – October 2021 (Layoff)
- Designed, tested, deployed, maintained and refactored RESTful API integrations with partners for data transfer and disposition.
- Successfully built data pipelines for 4 new insurance verticals and improved existing verticals.
- Designed reusable components for company wide front end systems.
- Built and launched embeddable and customizable widget for hosting EverQuote services on partner websites.
- Upgraded languages and libraries to keep services up to date.
- Updated and backfilled existing databases.
- Utilized internal, external and cloud based tools for debugging, monitoring and optimizing micro-services.
- Collaborated closely with partners, engineers and enterprise teams to ensure consumer and business satisfaction.
- Trained new engineers and created documentation.

Launch Academy, Boston, MA – *Full Stack Software Developer* | July 2017 – November 2017
- Developed several Ruby on Rails and React.js applications using test driver development.
- Designed and created an online forum for musicians to receive feedback on their songs.
- Built a user review website for ski slopes and resorts.

Education
